THE DESIG DIAMOND THIEF.

Detectives Believe the Robbery Was Done by Ed. Whalen, Alias Wall, Inspector Hollinberger was yesterday Whalen, allas Wall, a notorious diamond thier, who is supposed to be one of the men who entered the jewelry store of Gerome Desio, on F street, about three

The job was one of the sort Whalen is an expert in performing, and the police after investigating the robbery, believed past record, might have been guity of this crime. Accordingly, information was sent out to the police of all the principal cities to arrest Whalen on suspicion, and the local detectives have since been endeavoring to ascertain whether or not he was in the city at the time the robbery was

committed. Whalen was arrested Sunday and has been identified by a New York jeweler as the man who committed a similar rob bery in that city last December, when the merchant lost a large quantity of valuable stones. Whalen's photograph has been in the rogue's gallery for a number of years, but the latest picture which the local police have, was taken in 1891, and it is thought that his appearance has materially

changed since that time. Mr Desio yesterday afternoon called at police headquarters and was shown the photograph by Inspector Hollinberger.

He was not able to positively identify it as that of the man who was in his store when the gems were stolen, but will go to New York soon and take a look at the mun himself. Should Whalen prove to be the thier he will first be tried for the robber committed in New York, and it will doubt for the Desto robbery, as his New York victim fully identified him.
